## Species Distribution by Aquarium Zone

## Water Quality & Fish Species Compatibility Directory

| Species Name        | Aquarium Zone      | Min Volume (Liters) | Compatible Sources | % of Total Water Sources |
|---------------------|--------------------|---------------------|--------------------|--------------------------|
| Kribensis           | bottom / midwater  | 90                  | 2303               | 70,30%                   |
| Clown loach         | bottom             | 450                 | 2268               | 69,23%                   |
| Pearl gourami       | surface / midwater | 120                 | 2108               | 64,35%                   |
| Black skirt tetra   | midwater           | 75                  | 1903               | 58,09%                   |
| Bronze corydoras    | bottom             | 75                  | 1903               | 58,09%                   |
| Cherry barb         | midwater           | 60                  | 1903               | 58,09%                   |
| Common pleco        | bottom             | 450                 | 1903               | 58,09%                   |
| Electric blue acara | midwater / bottom  | 150                 | 1903               | 58,09%                   |
| Gold barb           | midwater           | 90                  | 1903               | 58,09%                   |
| Oscar               | midwater           | 300                 | 1903               | 58,09%                   |
| Pearl danio         | surface / midwater | 75                  | 1903               | 58,09%                   |
| Peppered corydoras  | bottom             | 75                  | 1903               | 58,09%                   |
| Pictus catfish      | bottom / midwater  | 200                 | 1903               | 58,09%                   |

# Water Quality & Environmental Risks

Environmental risk monitoring and hydrochemical analysis of water quality data

39,01%

Human Potability Rate

7,12

Avg Chloramines Level

3276

Total Water Samples

## Potability Status

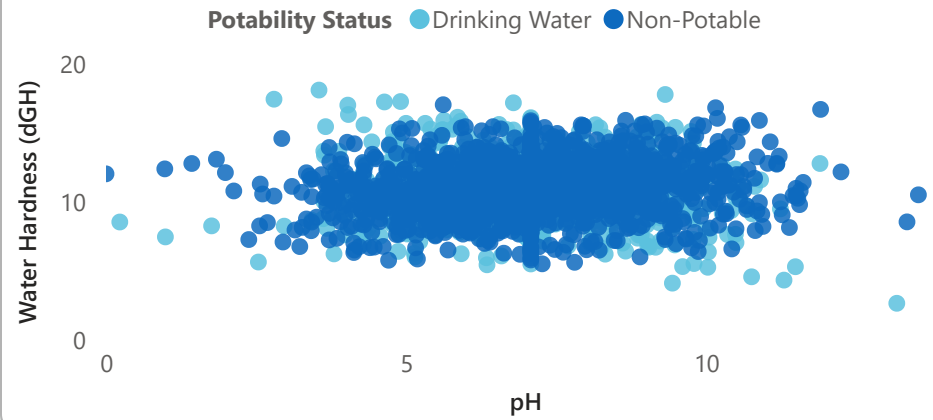

Drinking Water

Non-Potable

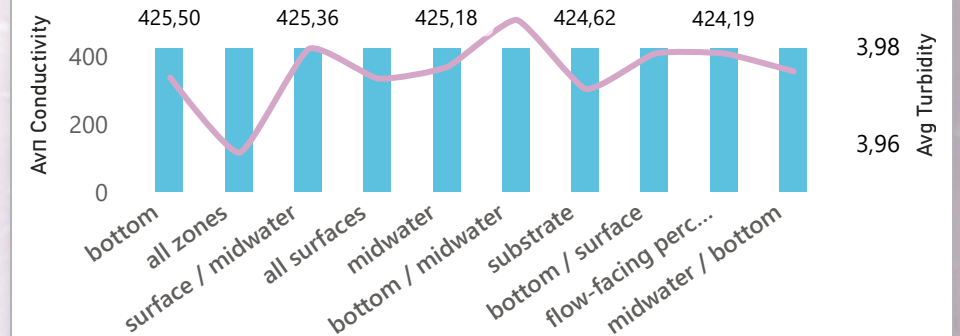

## Water Hardness Category

- ☐ Hard (12-18 dGH)
- ☐ Medium (8-12 dGH)
- ☐ Soft (4-8 dGH)

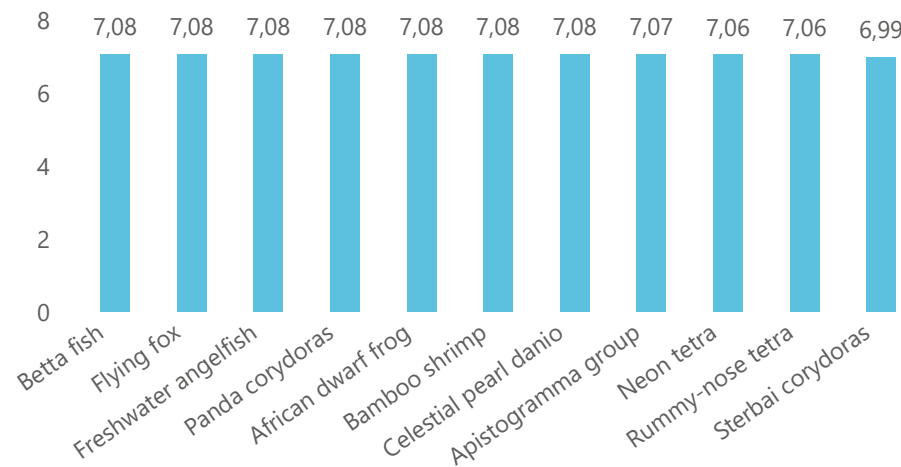

## Water Source Chemical Distribution (pH vs. dGH)

## Water Clarity & Conductivity Profile by Aquarium Zone

## Top 10 Species with Lowest Chloramine Tolerance

## Top 10 Species by Sulfate Exposure
